

47TH FLYING TRAINING WING

ENVIRONMENTAL COMMITMENT STATEMENT

As the host wing for all units assigned to Laughlin AFB, the 47th Flying Training Wing is committed to the protection of the natural environment while providing a safe and healthy work environment.

To support this commitment, every military member, civilian, and contract employee on Laughlin AFB should actively implement the Environmental Management System (EMS). Proper use of EMS aspects in our daily operations, facilities, and personal actions is essential. Our goal is to reduce the environmental impacts on Laughlin AFB and the surrounding communities by implementing an effective EMS.

Complying with all state and federal environmental regulations
Leading others to do the right thing for the environment, training and guidance
Ensuring environmental protection and conservation are primary management responsibilities of every Airman
Adopting attainable goals to promote conservation of our natural and man-made resources
Navigating the mission requirements with environmental regulations

Installation personnel shall comply with all federal, state, local, and Air Force environmental laws and regulations. Units will strive to minimize and eliminate the creation of waste and the release of pollutants; conserve natural resources by reusing, recycling, and purchasing recycled materials; and ensure responsible use of energy by conserving energy, improving energy efficiency, and using renewable energy sources.

The Commander's EMS program will be communicated to all Laughlin AFB personnel. The mandatory EMS Awareness training can be found in The Environmental Awareness Course Hub (TEACH) at <https://usaf.learningbuilder.com/account/login> or contact the Laughlin AFB EMS Coordinator at 298-5694 or email at laura.meyer_frerich@us.af.mil.

TYLER J. ELLISON, Colonel, USAF
Commander, 47th Flying Training Wing
